FRECON ELECTRIC (SHENZHEN) CO.,LTD.

About Us

FRECON Electric (Shenzhen) Co, Ltd.is a national key high-tech enterprise, a dual-soft enterprise in Shenzhen, and a professional company in the fields of industrial automation, high efficiency and energy saving, and green new energy. We have more than ten years of experience in the development and application of frequency converters, servo drives, energy-saving control cabinets, industrial robots, solar inverter systems, electric vehicle drive and control systems. The product power range covers 0.2kW~1MW, and the products are in EMC and safety regulations. All meet the requirements of the EU CE Directive.

Obtained more than 40 patents and copyrights for inventions, utility models, appearances, and software works. The quality system strictly complies with the ISO9001:2015 standard. Products are widely used in equipment manufacturing and energy-saving renovation projects, mainly involving elevators, petroleum, chemical, steel, ceramics, air compressors, textiles, wire drawing machines, machine tools, solar energy and many other fields.

FRECON Electric (Shenzhen) Co., Ltd. has seven regions in East China (Wuxi), South China(Shenzhen), North China (Shijiazhuang), Northeast(Shenyang), Southwest (Chengdu), Northwest (Xi'an), Central China (Changsha), etc. The logistics center has 12 offices nationwide, and has established a nationwide logistics and service network. There are joint insurance centers and distribution networks in more than 70 countries including Australia, Poland, Spain, South Africa, Russia, India, and Vietnam.

FR150A Series

Multifunction Inverter

Single Phase

220V : 0.4~2.2KW

Three Phase

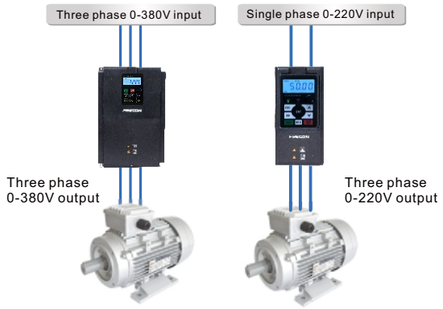
380V : 0.75~160KW

Applications

FR150A series multi-functional Inverter is a product developed on the latest technology platform of FRECON, with advanced control modes for high torque, high precision, high reliability, and wide-speed drive. The FR150A features ideal for equipment matching, engineering reconstruction, automation control and other special industry applications.

Suitable for various types of motors

Standard application wiring



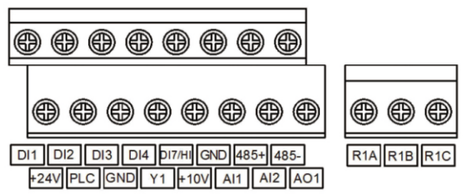
Special application wiring

(※Please contact our sales staff to use the following application methods)

Leading Technology Platform and Optimized Structural Design

Small size, compared with the previous generation of products with the same power, it greatly saves installation space and facilitates the layout of electronic control devices; for the whole series, the maximum installation area is reduced by 40%, and the volume is reduced by 50%.

40% reduction in area and
50% reduction in volume



Common DC Bus

Multiple FR150A units can be connected in parallel to share regenerative braking energy, thus the power of braking resistor can be reduced or cancelled.

Rich protection functions

Comprehensive protection to ensure reliable operation

Built-in RS485 communication (Modbus)

RS 485 terminals, support standard Modbus RTU communication for system integration

Product Specifications

Item		Specification
Input Power	Rated Input Voltage (V)	Single-phase 220V (-15% ~ +20%) Three-phase 380V (-15% ~ +30%)
	Rated Input Frequency (Hz)	50Hz/60Hz, ±5%
Output Power	Rated Output Voltage (V)	0~Rated input voltage, Error<±3
	Rated Output Frequency (Hz)	0.00~600.00 Hz, unit 0.01Hz
Control Characteristics	Control Method	V/F control ; Sensor-less vector control 1 ; Sensor-less vector control 2
	Speed Range	1:50 (V/F control) ; 1:100(sensor-less vector control 1) ;1:200(sensor-less vector control 2)
	Speed Accuracy	±0.5% (V/F control) ; ±0.2 %(sensor-less vector control 1 & 2)
	Speed Fluctuation	±0.3% (sensor-less vector control 1 & 2)
	Torque Response	<10ms (sensor-less vector control 1&2)
	Starting Torque	0.5Hz: 180% (V/Fcontrol, sensor-less vector control 1) 0.25Hz:180 %(sensor-less vector control 2)
Basic Functions	Carrier Frequency	0.7kHz~16kHz
	Overload Capacity	150% Rated current 60s ; 180% Rated current 10s ; 200% Rated current 1s
	Torque Boost	Automatic torque boost ; Manual torque boost 0.1%~30.0%
	V/F Curve	Three ways: Straight ; Multi-point type ; N Th-type V/F curve
	Acceleration And Deceleration Curve	Line or curve acceleration and deceleration mode Four kinds of acceleration and deceleration time, Ramp time range: 0.0 ~ 6000.0s
	DC Braking	DC braking frequency: 0.00Hz~maximum frequency, braking time: 0.0s~10.0s, braking action current value: 0.0%~150.0%
	Jog Control	Jog frequency range: 0.00Hz~~50.00Hz, jog acceleration and deceleration time 0.0s~~6000.Os.
	Simple PLC, Multi-Speed Operation	Realize up to 16-stage speed operation through built-in PLC or control terminals
	Built-In PID	It is convenient to realize the process control closed-loop control system
	Automatic Voltage Regulation (AVR)	When the grid voltage changes, it can automatically keep the output voltage constant
Operate	Command Source	The control panel, control terminal, serial communication port given
	Frequency Given	9 frequency sources: digital reference, keyboard potentiometer reference, analog voltage reference, analog current reference, pulse reference, serial port reference, multi-speed reference, PLG reference, and process PID reference. Can be switched in various ways
	Input Terminal	5 switch input terminals, one way to make high-speed pulse input 2-channel analog inputs, including 1-channel voltage input,1-channel voltage and current options
	Output Terminal	1 switch output terminal,1 relay output terminal,1 analog output terminal
Special Feature	Parameter copy, parameter backup, flexible parameter displayed & hidden. Reliable speed search started. Timing control, fixed length control, count function, three faults recorded, overvoltage stall protection, undervoltage stall protection, restart upon power loss, Motor thermal protection, Wobble frequency control, High-precision torque	
Protection	Provide fault protection function: overcurrent, overvoltage, undervoltage, overtemperature, overload protection etc .	
Environment	Place Of Operation	Indoors, no direct sunlight, free from dust, corrosive gases, flammable gases, oil mist, water vapor, water drop and salt, etc.
	Altitude	0~2000m De-rate 1 % for every 100m when the altitude is above 1000 meters
	Ambient Temperature	-10℃～50℃
Other	Installation	Wall-mounted or Flange mounting
	IP Grade	IP20
	Cooling Method	Fan cooled

FR500A Series
Vector Control Inverter

Three Phase

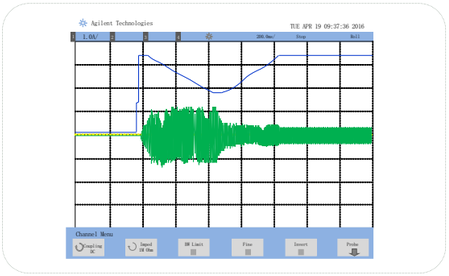
380V : 0.75~630KW

Applications

FR500 series vector control inverter is for OEM customers of the mid-high market and for applications such as fan and pump , flexible design, embedded SVC and VF control, widely used in the applications with higher requirements, such as the speed control accuracy and torque response speed, low frequency output characteristics.

Excellent Performance

- High-start torque characteristic
- 0.5Hz can provide 180% start torque (Sensor-lessvector control 1)
- 0.25Hz can provide 180% start torque (Sensor-lessvector control 2)
- Sensorless vector control can reduce susceptibility of motor parameter, improve the field adaptability



Speed tracking output frequency and current waveform

Strong overload ability

- Heavy load overload capacity:

  110% rated stable operation

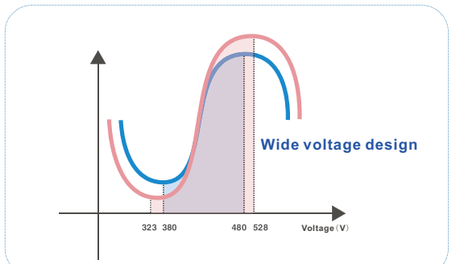
  150% rated load for 1min

  180% rated load for 10s

  200% rated load for 1s

Wide range voltage input with international standards

- Rated voltage: 3 phase 380-480V , 50Hz/60Hz
- Voltage fluctuation range:325-528V , 50Hz/60Hz



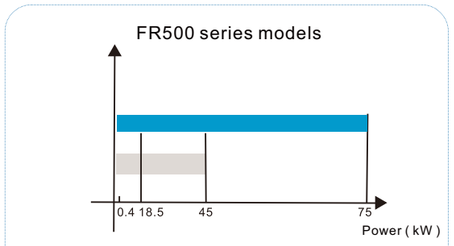
Wide voltage design

Perfect brake circuit scheme

- 45kW(G)-75kW(G) optional built-in braking unit
- Strong braking ability : The short-time braking ability can reach 1.1-1.4 times of inverter's rated power
- Brake protection is more comprehensive and intelligent

Speed tracking function

- In the case of fast start, the inverter can make the motor to start smoothly according to the current operation direction and speed of the motor



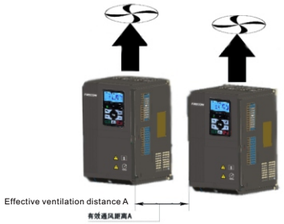
- FR500A series: Below 37 kw (including 37 kw) , built-in brake unit.45 kw ~75 kw built-in brake unit is optional

New technology platform, large margin derating design

- Adopting a new generation of rectifier bridge and IGBT hardware platform, the core main device configuration is higher

Independent air duct

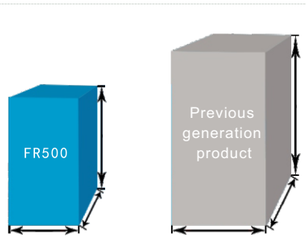
- The independent air duct design , can effectively prevent the dust from entering the inverter and causing the fault of short circuit, improve the reliability
- Select the long-life and max air flow rate cooling fans, effectivelly reduce inverter temperature rise, ensure reliable and stable operation



Wide voltage design

Optimized structural design, leading technology platform

- Compare with previous generation products of the same power , the size of FR500A series is smaller, greatly saves the installation space, it's convenient to layout the electronic control device ; maximum installation area reduced by 50%, volume reduced by 60%.
- Adopt a new generation of IGBT module technology, high junction temperature, high power density



Optimized structural design

Convenient debugging

- Strong back background software
- Factory shortcut mode
  It can quickly set the commonly used parameter options, allowing customers to save a lot of time to read the manual
- Dedicated upload and download module to facilitate parameter debugging
- Restore factory parameters, backup user parameters
- Develop special application macros according to industry needs

Powerful background software

	V/F Curve	Three ways: linear type; multi-point type; Nth power type V/F curve
	Acceleration And Deceleration Curve	Linear or S-curve acceleration and deceleration mode. Four kinds of acceleration and deceleration time, the acceleration and deceleration time range is 0. 0~ 6000.0s
	DC Brake	DC braking frequency: 0. 00Hz~maximum frequency, braking time: 0. 0s~10. 0s, braking action current value: 0. 0%~150. 0%
Special Feature	Parameters copy, parameters backup, flexible function code shown and hidden, reliable speed search, timing control, fixed-length control function and counting function,14 group of fault records, overvoltage stall, under voltage stall, power-on restart, restarting function, the motor temperature protection function, frequency control operation , high accuracy of torque limiting, Sensor-less torque control	
Protection	Provide adozen fault protection : over-voltage, over-current,under-voltage, over-temperature, overload,etc	
Environment	Operation Place	Indoors, no direct sunlight, no dust, no corrosive gases, no flammable gases, no oil mist, no water vapor, no water drop and salt, etc
	Altitude	0~2000m Derate 1 % for every 1 00m when the altitude is above 1000 meters
	Ambient Temperature	-10~40°C(when environment temperature is in 40~ 50°C, please derating use.)
Other	Installation	Wall-mounted or flange mounting
	IP Ddegree	IP20
	Cooling Method	Forced air cooling

FR510A Series

Close Loop Inverter

Three Phase

380V : 0.75~710KW

Applications

FR510 series vector control inverter is mainly positioned for OEM customers in the mid-to-high-end market and applications for synchronous motors. Its design is flexible, embedded with SVC, VF, and VC controls, and can be widely used in speed control accuracy, torque response speed, Low frequency output characteristics have higher requirements The required application

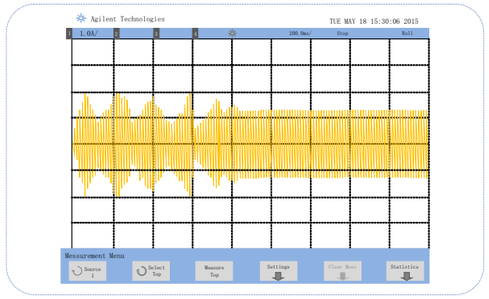
General Purpose Inverter

New technology platform, large margin derating design

- Adopting a new generation of rectifier bridge and IGBT hardware platform, the core main device configuration is higher

Oscillation suppression function

- When detected motor oscillation, automatic trimming output voltage and frequency make motor running smoothly



Oscillation Suppression Waveform

Comprehensive Protection Functions

- FR500A and FR510A series have comprehensive protection functions such as output to ground short circuit protection, fan drive circuit protection, external 24VDC short circuit protection, motor overload protection, optional PT100 / PT1000 motor temperature protection function, etc.
- According to the severity of the fault type, it can be selected as pre-warning,fault stop and continuous operation, it is convenient for maintenance
- It can automatically pass voltage compensation under heavy load to achieve constant output voltage and meet the needs of the power supply industry.

Multiple Communication Expansion Card

- Support PROFIBUS, CAN, GPRS DTU and other communications
- Support a variety of PG cards and expansion cards

Match with various encoder (FR510A)

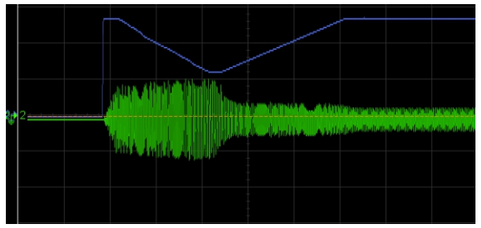
- Support 0C, push-pull, differential, EN1313, U\V\W resolver and other encoders

Built-in self-adaptive PID function module

- Built-in two groups of PID parameters , which can automatically switch according to the deviation, DIterminal and frequency conditions
- Given and feedback source selection is various, practical
- Detect function of PID feedback loss , which is convenient for user to detect faults
- support dormancy and wake up function, can be switched according to the frequency and pressure

Speed tracking function

- In the case of fast start, the inverter can make the motor to start smoothly according to the current operation direction and speed of the motor



Speed tracking output frequency and current waveform

Strong overload ability

- Heavy load overload capacity:
  150% rated load for 1min,
  180% rated load for 10s,
  200% rated load for 1s.

Flexible and diverse terminal functions

- Multi-function terminals DI, DO, A0 have a variety of logic function options;
- The AI terminal can be flexibly selected as a multi-functional DI terminal;
- Built-in multiple sets of virtual DI and D0 function selection, reducing external DI/D0 wiring;
- Support high-speed pulse input and output, up to 100KHz

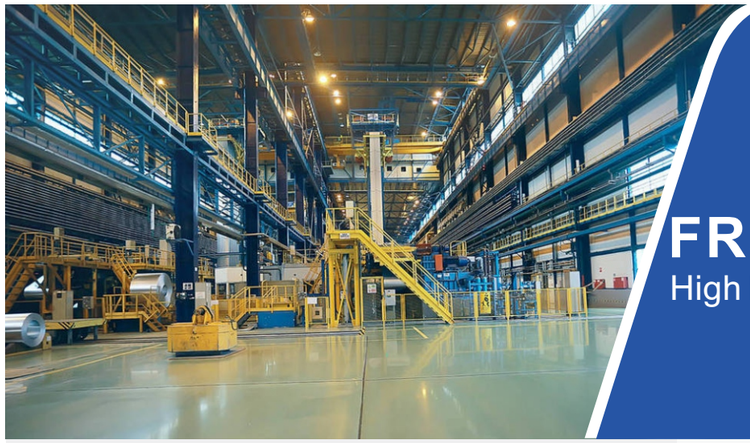
General Purpose Inverter



FR30 Series
High Performance Inverter

Three Phase

380V : 0.75~110KW

Applications

FR30 series is a new generation inverter of FRECON , with high performance, high quality and high power density design. It is mainly positioned as a full-featured product in the mid -to-high-end market. Its design is flexible, has built-in VC, SVC, and VF controls. Can be widely used in applications with high requirements for speed control accuracy, torque response speed ,and low-frequency output characteristics.

Excellent performance

- High starting torque characteristics
- 0.5Hz can provide 150% start torque (Sensor-less vector control 1)
- 0.25Hz can provide 150% start torque (Sensor-less vector control 2)
- Sensor less vector control is less sensitive to motor parameters, improve the field adaptability

Flexible and diverse terminal functions

- Multi-function terminal DI, DO, AO has a variety of logic function
- AI terminal can be used as multi-function DI terminal, flexible to select
- Built-in multi-group virtual DI and DO function selection to reduce external DI/DO wiring
- Support high-speed pulse input and output, up to 100KHz

Reactors and EMC

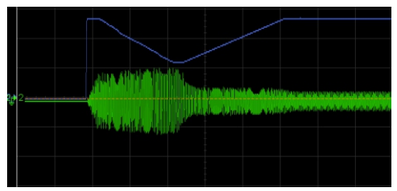
- Harmonic reduction with dual DC reactors(Figure 1)
- Meet EN61000-3-12 harmonic standard
- With EMC C2 filters can be installed in the complex environment(Figure 2)

Figure 1

Figure 2

Reliability design

- Corrosion resistant coated circuit boards, minimizing airflow through control panel areas, design features such as ground failure protection, and a 50° C ambient design make the FR30 a safer selection



Operate when the V/F is fully separated and semi-detached

- An automatically compensate by voltage when overload, realize output voltage constant and meet the application requirements of power supply industry

Speed tracking function

- In the case of fast start, the inverter can realize the motor smooth and no impact start according to the current operation direction and rotate speed of the motor

General Purpose Inverter

Technical Parameters

Item		Specification
Power Input	Rated Input Voltage (V)	3-Phase 380V -15%~+30%
	Rated Input Frequency (Hz)	50Hz/60Hz ±5%
Power Output	Rated Output Votage(V)	0~Rated Input Voltage Error±3%
	Rated Output Frequency(Hz)	0.00~600.00Hz Unit:0.01Hz
Control Characteristics	Control Method	V/F Control Sensor-less vector control 1 Sensor-less vector control 2 Close-Loop Vector Control
	Speed Range	1:50 V/F Control 1:100 Sensor-less vector control 1 1:200 Sensor-less vector control 2 1:1000 Close-Loop Vector Control
	Speed Control Accuracy	±0.5% V/F Control ±0.2% Sensor-less vector control 1/2 ±0.1% Close-Loop Vector Control
	Speed Fluctuation	±0.3% Sensor-less vector control 1/2 ±0.1% Close-Loop Vector Control
	Torque Response	<10ms(Sensor-less vector control)
	Starting Torque	0.5Hz:150%(V/F Control Sensor-less vector control 1) , 0.25Hz:180%(Sensor-less vector control 2), 0.00Hz:180%(Close-Loop Vector Control)
Basic Functions	Carrier Frequency	0.7kHz~16kHz
	Overload Capacity	150% rated current for 60s, 1 80% rated current for 10s, 200% rated current for 1s
	Torque Boost	Automatic torque boost; manual torque boost 0.1%~30.0%
	V/F Curve	Three ways: linear type: multi-point type; N-time equation V/F curve
	Acceleration/Deceleration Curve	Linear or S-curve acceleration and deceleration methods; four acceleration and deceleration times, the acceleration and deceleration time range is 0.0~6000.0s
	DC Braking	DC braking frequency: 0.00Hz~maximum frequency; braking time: 0.0s~ 10.0s; braking action current value: 0.0%~ 150.0%
Run	Command Source	Command Source Given the control panel, control terminal, serial communication port given.
	Frequency Ggiven	9 kinds of frequency sources
	Input Terminal	5 switch input terminals, one of which can be used as high-speed pulse input. Compatible with active open collector NPN, PNP and dry contact input methods.2 analog input terminals, 0~10V/0~20mA voltage and current optional
	Output Terminal	1 switch output terminal, supporting maximum 100kHz high-speed pulse output, 2 relay output terminals, 2 analog output terminals, and voltage and current are optional, which can realize the output of physical quantities such as set frequency and output frequency
Featured Functions	Parameter copy, parameter backup, flexible parameter displayed & hidden, common DC bus,Reliable speed search started, timing control, fixed length control, count function. 14 group faults recorded, overvoltage, under voltage, high-precision torque control, V/f separated control, torque control, sensor-less vector control and vector control.	
Protection	Provide fault protection dozen: Over-current, Over-voltage, Under-voltage, Over-temperature, Over-load Etc Protection.	
Display And Keyboard	LCD Display	Display parameters
	Key Lock And Function Selection	Realize the partial or complete locking of the keys, and define the scope of action of some keys to prevent misuse
	Parameter Backup	Can support backup of 3 sets of different setting parameters
Environment	Operation Plase	Indoors, free from direct sunlight, dust, corrosive gas, flammable gas, oil mist, water vapor, dripping water or salt, etc.
	Altitude	0~2000m De-rate 1% for every 100m when the altitude is above 1000 meters
	Ambient Temperature	-10℃~40℃(When environment temperature above 40℃, derating use)
Other	Installation	Wall-mounted or Flange mounting
	IP Grade	IP20/IP54
	Cooling Method	Forced air cooling

FR600 Series
Medium Voltage Inverter

Three Phase

550V : 4~400KW

Three Phase

690V : 15~710KW

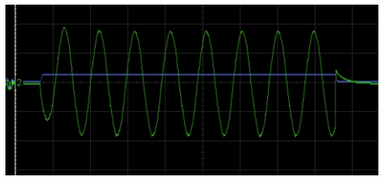
Applications

FR600 Series can be customized designed for industry solutions in Metallurgy, Crane, Petro, Chemical and Mining industries. Specifically France, Germany, Finland, South Africa and other countries developed industrial grid voltage for medium voltage drives.

General Purpose Inverter

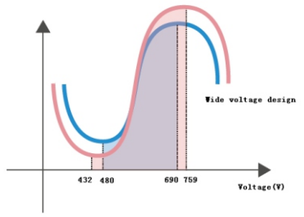
Excellent performance

- High starting torque
- 180%Rated torque / 0.5Hz(SVC 1)
- 180% Rated torque / 0.25Hz(SVC 2)
- Reduce the sensitivity from SVC control to motor parameter,to improve the site adaptability



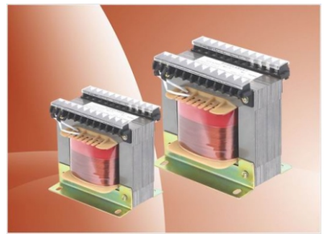
Superior Immunity design

- Wide operating voltage range, low voltage by over-modulation technology to ensure load capacity.
- On the grid surge (lightning strike), power grid noise, electrostatic immunity, to harsh industrial standards.
- Control power and bus separation; control power transformer isolated isolation separate power supply, control power standarddesign of the filter circuit.



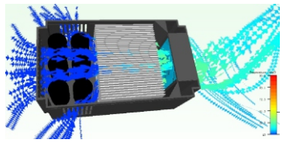
Superior environmental adaptability

- Standard products using three anti-paint treatment
- Duct isolation technology, resistant to moisture, dust, sealed design, easy to deal with harsh industrial environments.



Large margin derating design

- 32 bit Cortex-M3 ARM core host CPU, clocked at144MHz.
- Infineon IGBTmodule 1700V voltage level.
- 100ov voltage electrolytic capacitors (50ov grade),
- 180ov voltage rectifier module (50ov grade),
- 120ov voltage electrolytic capacitors (66ov grade)
- 240ov voltage rectifier module (66ov grade)



Convenient debugging

- Powerful background software
- Short-cut menu
  Common parameters setting rapidly to save customer's time to read manual
- Design special application macro according to industry demand
- Unique upload and download module which is convenient for parameter commissioning. Restore factory parameters, backup user parameters

	Torque Boost	Automatic torque boost, manual torque boost 0.1 ~ 30.0%
	DC Braking	DC braking frequency: 0~maximum frequency; braking time: 0.0~10.0s; braking action current value: 0.0~150.0%

FR580 Series

IP65 Inverter

Single Phase

220V : 0.4~3KW

Three Phase

380V : 2.2~55KW

Applications

FR580 series is a high-protection inverter with complete over-current, over-voltage, overload, under-voltage, under-load and other protection functions. It is widely used in outdoor and strong corrosive gas environments.

Feature

- IP65 design, high protection level outdoor installation model
- Adopt natural cooling method, low noise (7.5KW and below power)
- Widely used in various AC asynchronous motors, synchronous motors, reluctance motors
- GPRS remote monitoring real-time running status, real-time start and stop (optional)
- Operating environment temperature range: -25~60 degrees
- It has perfect overcurrent, overvoltage, output phase loss protection, short circuit, overheating and other protection functions

Special Purpose inverter

SY380 Series Voltage Boost Inverter

FR500H Series Multi-Pump Constant Pressure Inverter

FR500D Series Special Purpose Inverter For Elevator

FR500S Series High Frequency Special Purpose Inverter

FR500L Series Wire Drawing Machine Special Purpose Inverter

FR500KFJ Series Open-Frame Special Purpose Inverter

IF500 Series IP65 Industrial Fan Inverter

SY380 Series
Voltage Boost Inverter

Three Phase 380V : 0.75~400KW

- Support dandy -removing function and clear the blockage of water pumps.
- Multiple protection, let customers use with confidence;
  The protection function is complete, there are multiple protection, overload, overwhelming, overcurrent and other protection.
- Function and general inverter -rich;
  Built -in PID, simple PLC, multi -speed function. Various V/F control curves can meet different application requirements.
- Compared with the transformer scheme, the size is smaller and the cost is lower;
- Derating design of components and high reliability
- Excellent performance:
  High start torque,
  Strong overload capacity

Applications

SY380 series inverter is a special inverter designed for the civil power grid (single-phase 220VAC) driven 380VAC motor. No need to add the transformer, then customer can easily drive 380V AC motor with this series.

FR500H Series
Multi-Pump Constant Pressure Inverter

Three Phase 380V : 0.75~400KW

Ideal for multi-pumps constant pressure water supply and sewage treatment of residential building and municipal projects, with the function of easy setting of power frequency pumps, variable frequency pumps, dormant pumps, and auto-switch according to system status, timing constant pressure water supply, dormancy control, self-cleaning control, timing rotation control, water level control, and pipeline pressure detection and protection.

- Support dandy -removing function and clear the blockage of water pumps.
- Support dry pumping detection function to prevent the pump from burning out.
- Support pressure sleep and wake up function.
- Support the pipepressure filling function to prevent pressure overshoot at startup (slowly run the pipe before starting PID adjustment for pressure filling).
- Multiple rotation modes (to prevent single water pumps from running for a long time).
- Multiple water pump control mode.
- Support 1 frequency trailer 4 industrial frequency motor

Applications

FR500H multi -pump constant voltage water supply -specific inverter is based on the core algorithm of the FR500 vector control inverter, combined with the application control requirements of constant pressure water supply, a special inverter developed, which has a living community and municipal engineering. Multi -pump constant pressure water supply and sewage treatment function

FR500D Series
Special Purpose Inverter For Elevator

Three Phase 380V : 4.0~75KW

- Can drive AC three -phase asynchronous motor and AC permanent magnet synchronous motor
- Support opening and closed -loop control
- Unique S curve and inductive weight function
- Start, stop parking, good comfort, flat layer accurate
- Unique short floor function with shortest time to ensure the operation efficiency
- When UPS provides a power supply, run in the emergency operation mode
- Calligraphy of Elevator Logic Logic Control

Applications

FR500D series inverter is designed according to the carrying characteristics of elevator. It adopts high performance vector control technology, can control both asynchronous motor and synchronous motor. For asynchronous motor open-loop vector control, it combined with innovative sensor start/stop compensation technology without weighting to ensure the comfort when elevator start/stop without weighting device.

FR500S Series
High Frequency Special Purpose Inverter

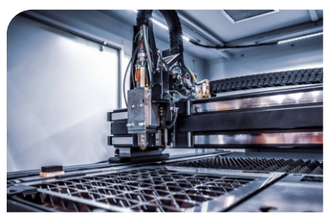
Three Phase 380V : 0.75~400KW

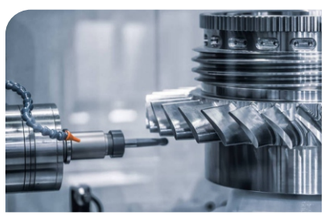
The FR500S series is a high -frequency closed -loop -specific inverter based on the FR510 platform, with high performance, high -quality, high -power density design. The main positioning is OEM customers with the mid -to -high -end market, with flexible design, embedded VC, SVC, VF control and one, supporting synchronous motor control, various PG cards, main axis orientation, pulse follow -up, zero servo and other position control. It can be widely used in applications that have high requirements for speed control accuracy, torque response speed, and low -frequency output characteristics.

- 0Hz ~ 4000Hz adjustable;
- The current is stable, the speed is not fluctuated, and the high frequency torque is large;
- Can achieve the motor fast stop, good current waveform, high accuracy;
- Perfect protection functions: input, output lack of phase protection, short circuit protection, overcurrent protection, overload protection, etc. Nearly 20 kinds of protection
- It has the advantages of fast speed, small volume, lightweight, low material consumption, low noise, low vibration and other advantages;

Applications

The FR500S series high -speed motor drive inverter developed independently developed by our company can reach the highest output frequency of 4000Hz, which can well meet the field processing fields, such as workers, computer carving machines, CNC carvings, precision grinding machines and other customers. need.





Special Purpose Inverter

FR500L Series
Wire Drawing Machine Special Purpose Inverter

Three Phase 380V : 0.75~132KW

- **Rich dedicated machine macro application**
  Select the application macro according to mechanical equipment to reduce parameter adjustment
- **Compact structure**
  Compared to the same industry, the size is small, saving the installation space
- **User menu custom**
  Suitable for the machinery and equipment of wire and cable industry such as water tank -type drawing hosts, water tank -type drawing rollers, direct -to -incert
- **Stand -up on any location**
  It can be turned on at any position of the lower limit, middle point or upper limit of the tension balance rod, and automatically track the speed of the drawing line.
- **Plascrons are not moving**
  Automatically track the speed of drawing lines, and the tension balance rod is basically maintained at the position of the balance rod. Regardless of the empty disk, half -plate, full disk, regardless of the thick lines, fine lines, whether low, medium -speed, high -speed, tension is always constant

Applications

The FR500L series wire -pull machine industry special inverter is based on the FR500 inverter control algorithm, combined with the application control requirements of the drawing machine, and developed a special inverter specifically for the wire pull machine industry. It can be turned on at any position such as the lower limit of the tension balance rod, the middle point zero or upper limit.

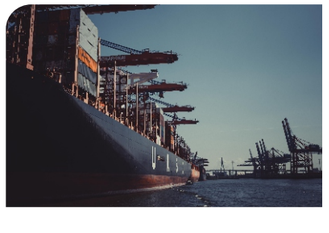
FR500KFJ Series
Open-Frame Special Purpose Inverter

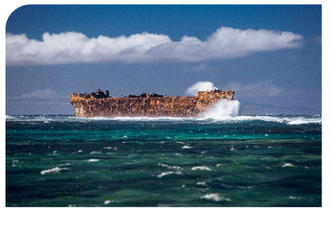
Three Phase 380V : 18.5~400KW

- **User menu custom**
  Users can design the product appearance according to the actual situation of the site, which is consistent with the overall style of the equipment and not abrupt. It provides customers with customized services
- **Provide OEM services to reduce costs for customers**
- **Ultra-thin design, save 20%-50%thick space**
- **The installation method of the middle partition is suitable for the safety isolation of the thermal source and the electrical system**
- **Function, performance is the same as the FR200 series**
- **Protection level IP00, users must cooperate with electrical control cabinet installation and use**

Applications

In accordance with market demand, Furuken launched the FR500KFJ open structure inverter, which consists of two parts: movement and radiator. Its functions and performance are the same as the FR500.





IF500 Series
IP65 Industrial Fan Inverter

Single 220V : 1.5KW
Three Phase 380V : 1.5~2.2KW

- For the more extensive industrial fan application, we have developed an integrated industrial fan controller IF500 with small size, simple assembly, and beautiful shape.
- Good compatibility, can drive synchronization and asynchronous motor
- Integration
  Digital display, digital knob speed adjustment, start -stop buttons. No need to assemble manually, just wiring
- Convenient wiring, using waterproof terminals, top-in and top-out wiring
- Easy to use
  No need to connect control wires, just power on and operate the knobs and buttons.

Special Purpose Inverter

Applications

Industrial fan is a common industrial machine widely used in high and large spaces such as industrial plants, logistics storage, waiting rooms, exhibition halls, gymnasiums, supermarkets, etc., as a space ventilation and personnel cooling. Compared with traditional HVAC and small high-speed fans, it has unparalleled application advantages.

FRECON

Servo Drive System

SD300 Series Servo Drive system

SD300 Series
Servo Drives

220V: 0.1-1.5KW

380V: 1.5-7.5KW

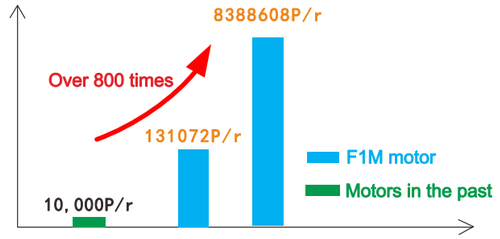
Applications

SD300 series is FRECON new generation servo drive , with thin and light appearance design, superior performance, good stability, easy to use, and multiple interfaces. Widely used in CNC machine, woodworking, laser, packaging, robots, 3C and other industries. Realize fast and accurate position control, speed control and torque control.

Features

Equipped with 23bit absolute encoder

With high resolutions encoders to meet the different application requirement.

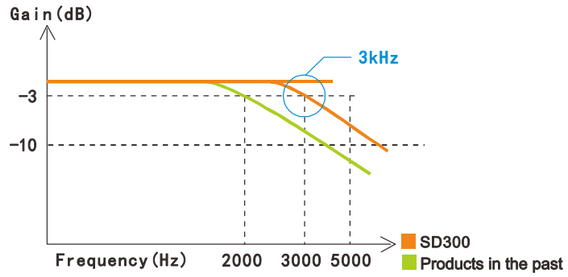


Powerful bus functionality

Standard Type-C Host Interface
Standard RS485 Communication
Optional EtherCAT Communication

Superior performance

With 23bit encoder, the speed loop bandwidth up to 3 kHz. Based on position feed forward for high-response control, to reduce response latency, the position tuning time can be as low to 1 ms.



Suppress device vibration

There are two vibration components at the end of the device. The SD300 series servo drive can simultaneously suppress the two vibrations at the end of the device, which can bring higher mechanical response.

Drive Technical Specifications

SD300 drive general technical specifications

Control method		IGBT PWM Control, sine wave current drive method, 220V, 380V: single-phase or three-phase full-wave rectification
Environment	Temperature	Working/Storage: 0°C ~ 55°C (the ambient temperature is above 45°C, derate by 10% for every 5°C increase) /-20°C ~ 70°C
	Humidity	Working/Storage: Below 90%RH (no condensation)
	Vibration	4.9m/s² / 19.6m/s²
	Atmospheric pressure	86kPa ~ 106kPa
IP grade		IP20
Altitude		Maximum altitude is up to 2000m. No derating is required for use at 1000m and below. Derating by 1% for every 100m above 1000m.
Feedback method		Single-turn/multi-turn absolute encoder (Tamagawa protocol)

SD300P drive technical specifications

Position Mode	Input signal	Pulse command	Input pulse type	Three command formats:Direction + Pulse; A, B Phase Quadrature Pulse; Forward/Reverse Pulse
			Input Mode	Differential input, Collector Open Circuit
			Input Frequency	Low speed：⩽500kHz (differential input) ； ⩽200kHz (single-ended input) High speed：⩽4MHz (differential input)
	Position output	Output mode		A phase, B phase: differential output Z phase: differential output or open collector output
		Frequency division ratio		Any frequency division ratio
Speed Mode	Analog command input			-10V ~ +10V，Input impedance10kΩ,0~10V
	Command acceleration and deceleration			Parameter set
	Command source			Analog 、Parameter set
Torque Mode	Analog command input			-10V ~ +10V，Input impedance10kΩ,0~10V
	Speed limit			Parameter set
	Source of command			Analog 、Parameter set
Input and output signals	Digital input signal	Input signal function selection		7 DI DI1 ~ DI5 Digital signal inputs with a maximum frequency of 1kHz (frequency may decrease when the current-limiting resistance is greater than 2.4kΩ). DI8 ~ DI9 Digital signal inputs with hardware delay less than 1ms (current-limiting resistance is 2.4kΩ). DI functions are as follows: Servo enable, Alarm reset/clear,Forward drive disable, Reverse drive disable, Forward torque limit, Reverse torque limit, Emergency stop, Electronic gear selection 1,Electronic gear selection 2,Clear position deviation, Disable pulse input
	Digital output signal	Output signal function selection		5DO, programmable output terminal (photoelectric isolation) DO functions are as follows: Servo ready, alarm, positioning completed, speed reached, electromagnetic brake, torque limit, etc.
	Analog input signal			Voltage input specifications: -10V ~ +10V; maximum allowable voltage: ±12V

Servo Drive System

SD300P drive technical specifications

Built-in function	Overtravel (OT) prevention function	P-OT, N-OT stops immediately when operate
	Electronic gear ratio	Numerator and denominator: 1-32767/1-32767
	LED display	5 digit LED display
	Monitoring function	Speed, current position, position deviation, motor torque, motor current, command pulse frequency, bus voltage, module internal temperature, etc.
	Protective function	Overspeed, overvoltage, overcurrent, overload, abnormal braking, abnormal encoder, abnormal position, etc.
	Communication	Modbus RTU
	Host computer interface	USB, support parameter reading and writing, online upgrade

SD300N drive technical specifications

Input and output signals	Digital input signals	4 programmable input DI terminals (photoelectric isolation) 2 high-speed optocoupler input DI terminals (high-speed latch), supporting up to 200kHz DI functions as follows: Servo enable, Alarm reset, Gain switch, Mode switch 1, Mode switch 2, Zero-point fix enable, Forward over travel switch, Reverse over travel switch, Zero command, Positive external torque limit, Forward jog, Reverse jog, Electronic gear selection, Command direction setting, Home switch, Home return enable, Emergency stop, Clear position deviation, Set current position as home	
	Digital output signals	4 programmable output DO terminals, DO load capacity 50mA, voltage range 5V ~ 30V DO functions as follows: Servo ready for output, zero speed, positioning completed, approaching position, torque limit, speed limit, brake engaged output, warning output, fault output, home return completed, electrical home return output, torque reached output, speed reached output, DB brake output.	
Location mode	Performance	Feedforward compensation	0~100%
	Input signal	Position command input	EtherCAT communication mode: CSP (Cyclic Synchronous Position Mode) / PP (Profile Position Mode) / HM (Home Mode)
Speed torque control mode	Speed control range	1: 5000 (the lower limit of the speed control range is the condition for non-stop at rated torque load)	
	Torque control accuracy	±2%	
	Input signals	Speed command input	EtherCAT communication mode: CSV (cycle sync speed mode) / PV (contour speed mode)
		Torque command input	EtherCAT communication mode: CSV (cycle sync speed mode) / PV (contour speed mode)
Built-in function	Overtravel prevention function	P-OT、N-OT stop immediately when moving	
	Protection	Overcurrent, overvoltage, undervoltage, overload, main circuit detection abnormality, radiator overheating, overspeed, encoder abnormality, CPU abnormality, parameter abnormality	
	LED display function	5 digit LED display	
	Communication	EtherCAT, Maximum number of slaves 255	
	Other functions	Gain adjustment, alarm recording, JOG operation, dynamic braking	

Servo Motor Selection

Motor Model Description

F1 M - 40A 30 L 1 - A3 60
① ② ③ ④ ⑤ ⑥ ⑦ ⑧

①Product Series
F1:F1 series motor
F2:F2 series motor

②Rotor inertia
H:high inertia
M:medium inertia
S:low inertia

③Rated power(W)
A:×10
B:×100
For example:40A=400W
…

④Rated speed(Rpm)
15=1500rpm
20=2000rpm
25=2500rpm
30=3000rpm

⑤Input voltage(V)
L:AC 220V
H:AC 380V

⑥Brake
1:Without brake
2:With brake

⑦Encoder type
A: Magnetic Encoder
B: Optical Encoder
1: 17-bit Absolute Value Single-turn
2: 17-bit Absolute Value Multi-turn
3: 23-bit Absolute Value Single-turn
4: 23-bit Absolute Value Multi-turn

⑧Motor flange
40:40 flange
60:60 flange
80:80 flange
13:130 flange
18:180 flange

New Energy Products

PV150A&500 Series Solar Pump Inverter

PV580 Series IP65 Solar Pump Inverter

SP500 Series Off-Grid Solar Inverter

SP520 Series Off-Grid Solar Inverter

SP520 Plus Series Off-Grid Solar Inverter

DC 80-450V :

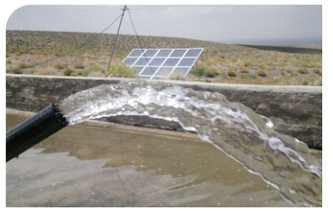
0.4~75KW

DC 230V-800V :

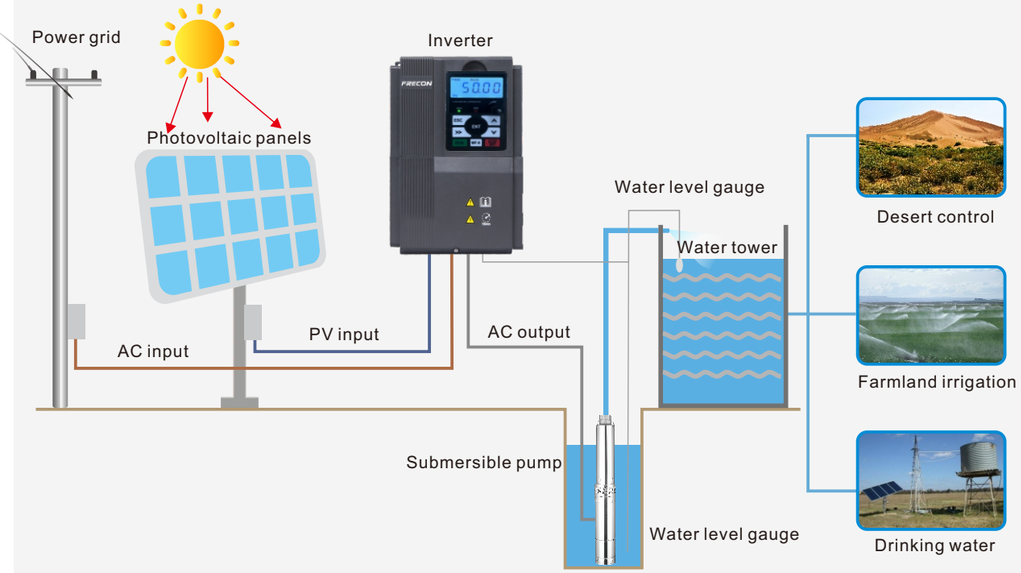
0.75~450KW

Applications

PV150A&500 series supports driving asynchronous water pumps, synchronous water pumps and BLDC, with an efficiency of over 99%, supports DC/AC power input, and can realize automatic switching without battery, automatically sleeps when the light is weak, and automatically resumes work when the light is strong, without manual operation. Under the same conditions, the water output is large.



Solar Pumping System Diagram



Features

Application
- Applicable to AM, PMSM, BLDC etc.

Hybrid power supply
- Support solar power DC/Power grid AC input, and DC/AC auto switch

Eco-friendly
- Operation without battery

Built-in protection
- Support over-current, over-voltage, phase loss, shortcircuit, over-temperature protection etc.

Dormancy and Wake-up function
- Inverter will entry dormancy mode and wake up automatically according to sunshine intensity

Large water yield
- Larger water yield under same condition

Water level control
- Dry run protection, tank water level control

Advanced MPPT algorithms
- Efficiency reaches 99%

Recording functions
- Recording for total power generated (Kw/h), waterflow(m3), and operation time(H)

Note:1.PV500 can customize 900V DC input
2. For parameters above 185kW, please refer to the manual

PV580 Series

IP65 Solar Pump Inverter

DC 80-450V :

0.4~3.0KW

DC 230V-800V :

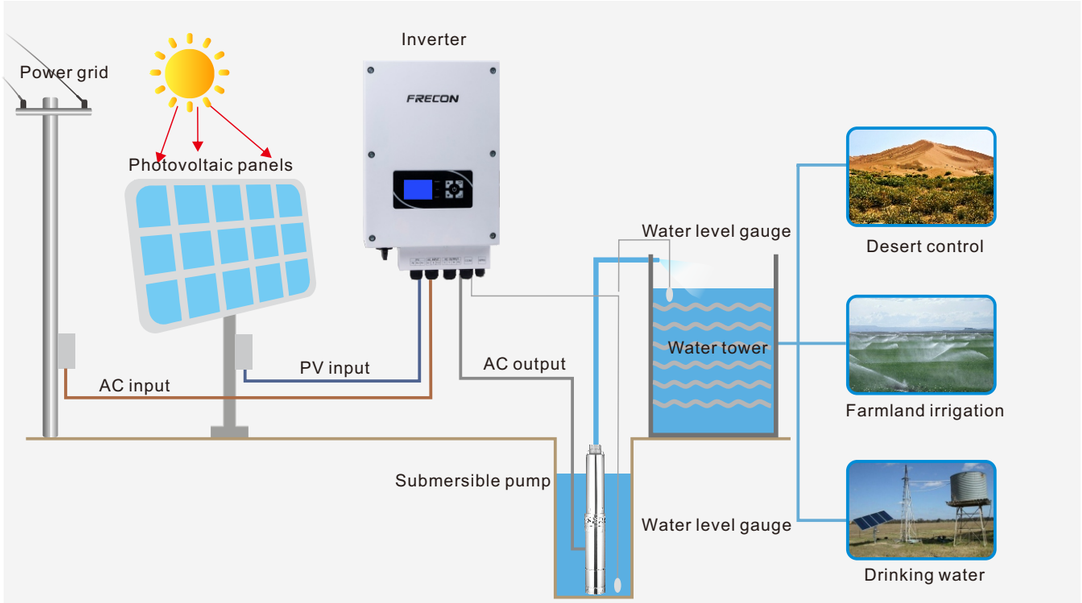
2.2~55KW

Applications

PV580 mainly solves problems such as agricultural irrigation, daily water use, and desert control in areas without electricity and water shortages. It is widely used in various AC asynchronous water pumps and synchronous water pumps. Fully automatic unattended operation, with perfect over-current, over-voltage, output phase loss protection, short circuit, overheating and other protection functions.

New Energy

Solar Pump System Diagram



Features

- Fashion design, easy operation
- IP65 design, outdoor installation
- Natural cooling method, low noise
- Compatible with DC / AC power input
- Excellent performance, large water yield
- Built-in start-stop button, operation easily
- Operating temperature range: - 25 ~ 60 ℃
- Optimized MPPT algorithm, efficiency> 99%
- Widely used in various AC asynchronous and synchronous pumps
- Supports over-voltage, phase loss, short circuit, over-temperature and etc. protection
- Models below 2.2kW are built-in DC boost module for lower DC voltage input to reduce quantity of solar panel
- All models can be configured with Internet of things module （Optional） for real-time remote monitoring and operation in mobile APP

FRECON

SP500 Series

Off-Grid Solar Inverter

DC 60~400V :

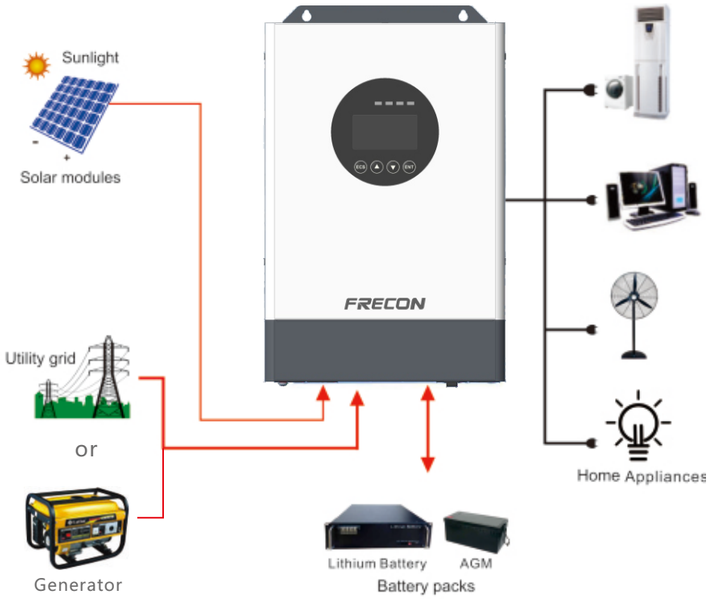
1.2KW

Applications

The SP500 series is a pure sine solar inverter with a built-in 60-400V MPPT photovoltaic controller, compatible with mains or generator power, configurable AC solar charger priority, and complete short circuit protection, overvoltage protection, overload protection, etc.

New Energy

Working Principle



Features

Support BMS battery management system:
Standard BMS battery management system communication interface, intelligent battery charging design to improve battery life.

Easy-to-control LCD panel:
Users can set the system parameters through the LCD panel at any time to improve the performance of the inverter.

Support USB upload/download function:
Standard USB interface, convenient for data upload/download.

Support mobile phone APP to monitor the inverter:
Standard Bluetooth, optional WIFI/GPRS module, monitor and control the inverter through the mobile phone APP.

Small size and light weight:
Compared with peers with the same power, SP500 inverter has smaller volume and weight, and is more convenient to install.

High conversion efficiency:
The conversion efficiency is as high as 98.7%, which is in the leading position compared with the peers.

FRECON

Technical Parameters

Model	SP500-1200-12L
Rated Power	1200W/1200VA
Input	
Rated Input Voltage	230VAC
Selectable Voltage Range	170~264VAC(For personal computers) ; 90~280VAC (For home applications)
Frequency	50Hz/60Hz(Auto sensing)
Output	
Waveform	Pure sine wave
AC Voltage Regulation (Batt,Mode)	230VAC±5%
Peak Power	2400VA
Switch Time	10ms (For personal computers) ; 10ms (For home applications)
Effiency	92%
Battery	
Battery Type	Lithium battery/Lead acid battery
Battery Voltage	12VDC
Constant Charging Voltage	14.1VDC
Float Charging Voltage	13.8VDC
Overcharge Protection	16VDC
PV&AC Charger	
Max.PV Array Power	2000W
MPPT Voltage Range	15~105VDC
Max.Voltage of Open Circuit	125VDC
Max.PV Charging Current	60A
Max.AC Charging Current	60A
Max.Charging Current	60A
General	
Dimension D*W*H(mm)	87*223*332
Weight	3.6
Protection Degree	IP21
Operating Temperature Range	-10~50℃
Storage Temperature Range	-15~60℃
Noise	50dB
Cooling Method	Fan cooling
Interface	
Communication	WIFI

New Energy

SP520 Series

Off-Grid Solar Inverter

DC 120V~495V:

3.5KW~5.5KW

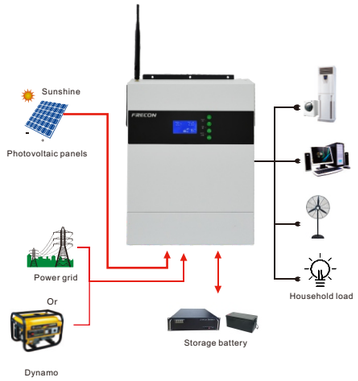
Applications

SP520 series are pure sine solar inverters, built-in 120-495V MPPT photovoltaic controller, support battery-free start, compatible with mains or generator power configurable AC/solar charger priority, with complete short-circuit protection, over-under Voltage protection, overload protection, etc.

Features

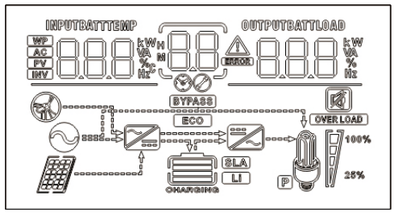
Solar power and grid power the load simultaneously

The inverter supports photovoltaic power and mains to supply power to the load at the same time.



Easy-to-control LCD panel

Users can set the system parameters through the LCD panel at any time to improve the performance of the inverter



Configurable output source priority

With complete short circuit protection, over voltage protection, overload protection, etc.

Configurable AC/Solar Charger Priority

Support no battery start

Support BMS battery management system

Standard BMS battery management system communication interface,
Smart battery charging design improves battery life

Support mobile phone APP to monitor the inverter

Standard WIFI module, monitor and control the inverter through mobile APP

FRECON

SP520 PLUS Series
Off-Grid Solar Inverter

DC 120V~500V: 3.5KW~5.5KW

Applications

SP520 Plus series are pure sine solar inverters, built-in 120-450V MPPT PV controller, support battery-free start, compatible with mains or generator power configurable AC/solar charger priority, with complete short-circuit protection, over-under Voltage protection, overload protection, etc.

New Energy

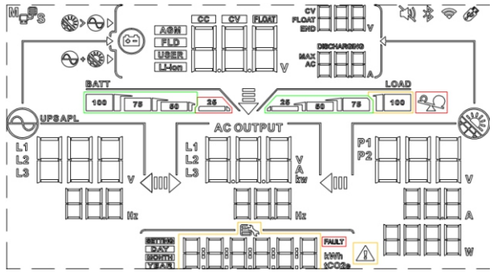
Features

Solar and grid power the load at the same time

Inverter can supply power to the load from solar power or grid power without battery connected

Convenient LCD operation

User can set up parameters through LCD panel easily to improve inverter performance



Supports BMS

Standard with BMS communication port, intelligent battery charging design to extend battery life

Support mobile APP monitoring inverter

Built in WIFI module for mobile APP monitoring

Configurable output source priority

With complete short circuit protection, over voltage protection, overload protection, etc.

Configurable AC/Solar Charger Priority

Support no battery start

PL10 Series PLC

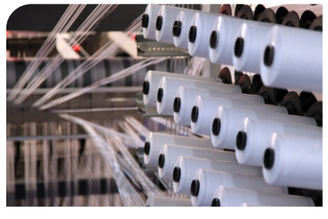
- **Various starting methods**
  - Voltage ramp current limit start
  - Current limit start
  - Jog
- **Two parking options**
  - Free parking
  - Soft parking
- **Perfect protection function**

  Phase loss, starting overcurrent, starting overload,A variety of comprehensive protection functions such as startup timeout.
- **Fault memory function**

  It is convenient for users to analyze the cause and troubleshoot.

Applications

PL10 is a miniature PLC launched by our company. It is a simple motion programmable controller with 4 pulse outputs. Beverage, packaging, plastic steel, construction machinery, air conditioners, elevators, printing and other machine manufacturing industries.



FRECON

Product Nameplate Description

PL10 14 10B T A 1

Product series code:
PL10 programmable controller

Number of input points
(in the example, 14 input points)

Number of output points
(10 points output in the example)

Module type:
B: Main module (Basic module),
E: Expansion module

Output mode
R: relay (Relay),
T: Transistor,
N: no output

Additional instructions:
A: AC220V power input,
D: DC24V power input,
N: No external power input

Special function version number
(can be ignored)

Features

- **Small model, high configuration, large capacity, high speed**

  The integrated analog input and output program capacity reaches 12K,The basic instruction only needs 0.3μs, and can be expanded to 4 modules
- **Abundant interrupt resources**

  Support communication interruption, pulse interruption, power failure interruption, And can set the interrupt priority to achieve advanced control
- **Flexible programming**

  Support MODBUS network, handheld computer, Three editing modes of remote dialing, convenient for maintenance and debugging
- **Convenient and practical features**

  Provide special function module configuration, inverter communication instructions, Simplify complex programming Provide system configuration verification tools to facilitate users to expand configuration
- **Safer, more stable and more reliable**

  8-digit password protection, which can be set to prohibit uploading of programs to prevent unauthorized copying, ultra-wide voltage design, three-proof processing, input filtering and power-off protection functions to ensure that the PLC is more stable and reliable
- **Strong communication networking capabilities**

  Support PLbus N:N network communication protocol, support OPC service, provide PROFIBUS-DP slave station communication simulation
- **Powerful positioning and high-speed processing capabilities**

  Positioning instructions to realize the position control of machinery and equipment.Variable-speed pulse output, including line pulse output function, realizes multi-stage variable speed control of servo or stepping motor Built-in high-speed processing: 6-way high-speed pulse input, maximum frequency 50KHz; 2-way 100KHz high-speed pulse output

PI10 Series

Technical Parameters

Project		Specification	
Implementation Modalities		Cyclic scanning + interrupt mode	
Programmatically		Instructions, Ladder Diagram, Sequential Function Chart	
Command Type	Basic Instructions Application Instruction	32 items 226 items	
Execution Time	Basic Instructions Application Instruction	0.3μs Several μs~hundreds of μs	
Program Capacity		12K steps	
Maximum Expansion		4 expansion modules, including I/O expansion and special function modules	
Input Relay (X)		X0~X177, 128 points, octal code	
Output Relay (Y)		Y0~X177, 128 points, octal code	
Auxiliary Relay (M)		M0~M2047, 2048 points	
Local Auxiliary Relay (LM)		LM0~LM63, 64 points	
Special Auxiliary Relay (SM)		SM0~SM255,256 points	
Status Relay (S)		S0~S1023,1024 points	
Timer (T)		256 points(T0~T255)	100ms precision: T0~T299, 210 pieces 10ms accuracy: T210~T251, 42 pieces 1ms precision: T252~T255, 4 pieces
Timer (S)		256 points(C0~C255)	16-bit count up: C0~C199, 200 32-bit up/down counting: C200~C235, 36 32-bit high-speed counting: C236~C255, 20
Data Register (D)		D0~D7999,8000 points	
Local Data Register (V)		V0~V63,64 points	
Index Addressing Register (Z)		Z0~Z15,16 points	
Special Data Register (SD)		SD0~SD255,256 points	
Hold Function		Can save M, S, D, C elements, 320 bit elements, 180 word elements	
Storage Medium		EEPROM+FLASH	
High Speed Counter		Single phase: 6 groups, 2x50KHz+4x10KHz Bi-phase: 2 groups, 1x30KHz+1x5KHz	
Pulse Output		Y0~Y1, two independent 100KHz output	
Interrupt Resource	External Input Interrupt High-Speed Counting Interrupt Timed Interrupt Communication Interruption Pulse Break Power Outage	16 (X0~X7, 8 channels support rising and falling edges) 6 3 8 2 1	
Analog Potentiometer Input		2 items (0~255)	
Pulse Catch		8 channels, X0-X1: 20μs, X2-X7: 100μs	
Digital Filtering		X0-X7 provide digital filtering, filtering time (ms) 0, 8, 16, 32, 64. Other hardware filtering	
Communication Port		X0-X7 provide digital filtering, filtering time (ms) 0, 8, 16, 32, 64. Other hardware filtering

HK Series HMI

High -performance processor

Industrial -grade high -performance
RISC 32BIT processor,
The main frequency reaches 400MHz

High -capacity Flash

Support the storage of large -capacity
data, not lost power off power,
Support U disk and SD card storage

Online simulation

Use a computer to directly connect PLC
to simulate Configuration project, can
get data from PLC

U disk guide

Support U disk update project
Support U disk update formula
Data that supports the U disk import and export

Applications

The HK series touch screen is a high -performance embedded integrated touch screen with industrial-grade high -performance RISC 32BIT processors as its core. The product design uses high brightness TFT liquid crystal. With powerful image display and data processing functions.

FRECON

Model Specification

HK 070- 1 0 S T

- Product series number: HK series
- Display size: 035 3.5" / 043 4.3" / 070 7" / 102 10.2"
- Number of serial ports: 1 1 / 2 2 / 3 3
- Ethernet: 0 none / 1 1 / 2 2
- Operation method: S touch type
- Model: T standard type / E enhanced type

Features

High -performance processor

- Industrial -grade high -performance RISC 32BIT processor,The main frequency reaches 400MHz

High -capacity Flash

- Support the storage of large -capacity data, not lost power off power, Support U disk and SD card storage

Gallery

- Provide a lot of rich, for vector gallery for various industries
- Support customized vector graphics, which can be painted by yourself
- Support picture formats such as BMP, JPG as gallery graphics

Text font

- Support True Type (TTF) font
- Font editing function that supports complex margin
- Unicode encoding, international standards

Online simulation

- Use a computer to directly connect PLC to simulate the configuration project, You can get data from PLC

Macro command programming

- Support C language script
- Support self -setting function library
- Support free portal communication protocol
- Support C standard mathematical computing function
- Multiple execution methods

U disk guide

- Support U disk update project
- Data that supports the U disk import and export
- Support U disk update formula

RQ100(A) Series
Digital Soft Starter

Multi mode starting

Voltage Ramp current limit starting
Current limit starting Inching

Two types of braking

Free stop
Soft stop

Perfect protection functions

Default phase, starting over current, starting overload, starting timeout protection and many other comprehensive protection functions.

Fault memory function

Easy for user analyzing and debugging

Applications

Products are widely used on motor transmission device in metallurgy, oil, firefighting, mine, petrochemical, and other industrial fields. An ideal replacement of traditional star/triangle transformation, self-coupled step-down, magnetic control step-down starting equipment etc.

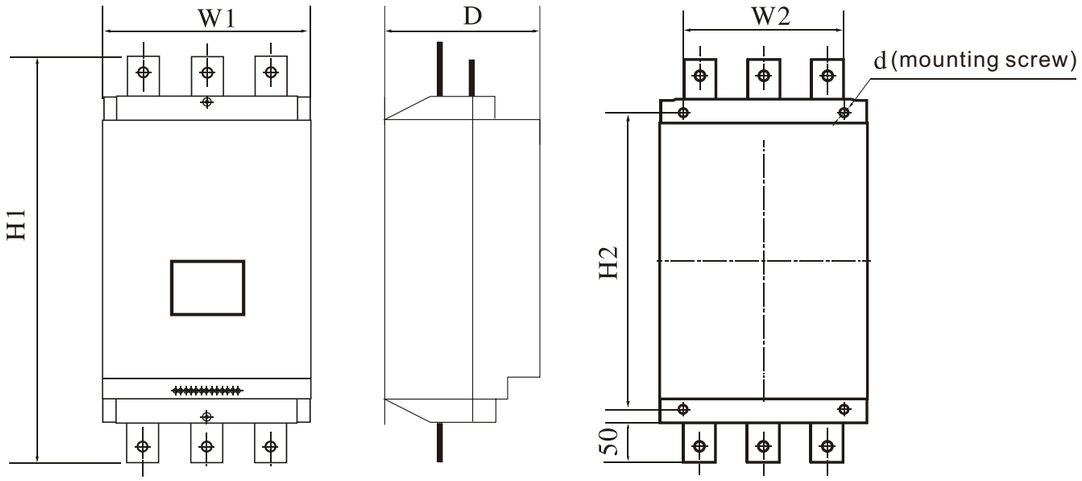
RQ100(B) Series
Digital Soft Starter

- **Three starting modes:**
  Voltage Ramp
  Current limit
  Jogging
- **Two types of braking**
  Free stop
  Soft stop
- **Perfect protection functions**
  Default phase, three-phase imbalance, starting over current, running overload, short circuit, overheating, starting timeout protection and many other comprehensive protection functions.
- **Analog output function:**
  4-20 mA analog output interface
- **Rated output can be set Programmable relay output:**
  Fault, preparation, start, run and other state programmable output

Applications

Products are widely used on motor transmission device in metallurgy, oil, firefighting, mine, petrochemical, and other industrial fields. An ideal replacement of traditional star/triangle transformation, self-coupled step-down, magnetic control step-down starting equipment etc.

Overall Dimensions And Install Dimensions



Model No.	Rated Power (kW)	Rated Current (A)	Overall Dimensions(mm)			Install Dimensions(mm)			Net Weight (kg)
			W1	H1	D	W2	H2	D	
RQ100-5R5B-3-H	5.5	11	170	302	219	144	263	7	6.5
RQ100-7R5B-3-H	7.5	15	170	302	219	144	263	7	< 6.5
RQ100-011B-3-H	11	23	170	302	219	144	263	7	< 6.5
RQ100-015B-3-H	15	30	170	302	219	144	263	7	< 6.5
RQ100-018B-3-H	18.5	37	170	302	219	144	263	7	< 6.5
RQ100-022B-3-H	22	43	170	302	219	144	263	7	< 6.5
RQ100-030B-3-H	30	60	170	302	219	144	263	7	< 6.5
RQ100-037B-3-H	37	75	170	302	219	144	263	7	< 6.5
RQ100-045B-3-H	45	90	170	302	219	144	263	7	< 6.5
RQ100-055B-3-H	55	110	170	302	219	144	263	7	< 6.5

355kw	ACL-4T-355	OCL-4T-355
400kw	ACL-4T-400	OCL-4T-400
450kw	ACL-4T-450	OCL-4T-450
500kw	ACL-4T-500	OCL-4T-500
560kw	ACL-4T-560	OCL-4T-560
630kw	ACL-4T-630	OCL-4T-630

Optional Cards

Type	Name	Model No.	Function
PG Card	5V differential input incremental encoder interface board	EXC-PG01	1. A+/A-, B+/B-Z+/100 million-pulse input 2. Maximum input frequency: 300KHz 3. Power output for PG: +5V, maximum current 200mA
	12V open collector/Push-pull input incremental encoder interface board	EXC-PG02	1. A, B, Z pulse input 2. Maximum input frequency: 100KHz 3. Power output for PG: +12V, maximum current 200mA
	Rotate transformer PG card (With GD control board)	EXC-PG03B	Provide resolver interface, including excitation signal EXC+/- and feedback signal SIN+/-, COS+/-, 10KHz
	5V UVW incremental encoder	EXC-PG04	Provide ENDAT2.2 type encoder interface
	ECN1313 Encoder (With CY control board)	EXC-PG05	HEIDENHAIN ERN1313 encoder PG card
	ERN1387 sin-cos encoder	EXC-PG06	HEIDENHAIN ERN1387 applicable type 1. Maximum input frequency: 20KHz 2. Power output for PG: +5V, maximum current 200mA
Communication Option Card	PROFIBUS-DP option external modul	EXC-COM01E	It is used for running/stopping the inverter, setting/viewing parameters and various monitoring by communicating with the host controller PROFIBUS-DP
	EtherCAT option external module	EXC-COM03	It is used for running/stopping the inverter, setting/viewing parameters and various monitoring through CANopen communication with the host controller
	MODBUS register adapter module	EXC-COM04E	Used for running/stopping the inverter, setting/checking parameters, and various monitoring by communicating with the host controller DeviceNet
	PROFINET option card	EXC-COM05	Used for running/stopping the inverter, setting/checking parameters, and various monitoring through Ethernet/IP communication with the host controller
	GPRS sending terminal 2G/4G	GPRS sending terminal IOT100	*
Other	Plastic machine expansion card	EXC-PM1	Support two analog inputs, current input range: 0-1A and 0-2A optional
	LCD keyboard	*	Full Chinese, English and Russian display interface and function operation buttons
	Keyboard extension cable	*	Extend the operation keyboard for remote control

FRECON

Brake Unit ,Brake Resistor

Voltage Level	Max Applicable Motor Power	Brake Unit	Brake Resistance (ED = 10%, 100%braking torque)	
			Resistance	Quantity
